

Win by "Stealth"

"Stealth"... a new generation of performance sail fabric from Horizon Sails.

Exclusive Features:

- Pretensioned, load bearing fibres to eliminate delamination
- Lighter, stronger and more durable than any other racing sailcloth.
- UV protective Mylar film protects load supporting fibres from sunlight degradation
- Options of Kevlar, Spectra, PBO and Pentex load bearing fibres
- Currently available in a range of weights and styles to suit all types of racing yacht.
- Sails designed and cut using most sophisticated and accurate computerised sailmaking system, to an accuracy of 1/10th of a millimeter
- To maintain accuracy and enhance durability, all seams are glued and sewn

Cost Effective!

Horizon "Stealth" sails are 5 – 10% less costly than competitors' sails made from lesser laminates.

LATEST DEVELOPMENTS

Stealth OFS (optimal fibre support) has multi-directional fibre support that follow the sail's load paths. This further stabilises the designed sail shape over the widest range of wind conditions.

TBC: Thermo bonded construction system providing ultra-smooth, fully moulded sails.
